# DR V BROOKS DUNBAR, THE CONFIDENCE COMMANDER CONFIDENCE COACHING SERIES

# How Confident are you in the belief that your relationships are moving you closer to your goals?

This workbook is designed to help you assess the strength of your relationships and the degree to which these relationships are positively or negatively challenging your dreams.

Relational confidence is the confidence we receive from the direct support of others in specific areas of our lives. These value-based relationships are an important aspect of goal achievement.

For relational confidence to occur, both parties must have a relationship of trust conjoined with identifiable and measurable actions that are aligned with positive and purpose-driven intentions.

Confidence-building is the active process of increasing your knowledge, skills, and abilities to a level that results in self-trust and belief in the choices and decisions you make, along with an expectation of positive outcomes resulting from your authentic actions and strategic reactions.

#### We exist to create high achievers and business performers.

We at The Center For Confidence (TCFC) believe that the outcome of coaching is self-belief and gaining "the confidence to act." Our mission is to empower every individual to gain and sustain confidence to achieve their full life potential, at the earliest age and opportunity.

I accept that I am a creator. Everything I could possibly need is AT THIS VERY MOMENT in and about my consciousness.

I am a command center of COURAGE, AUTHENTICITY, DECISIVENESS, AND POISE with the mental bandwidth necessary to fully activate and experience my dreams.

I create exactly what I need to be WHOEVER I WANT.
